

Action plan submitted by Burcu Kondu for Şehit Er Süleyman Aydın Ortaokulu - 06.01.2023 @ 20:18:02

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

## Infrastructure

### Technical security

- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.

### Pupil and staff access to technology

- › Since staff and pupils can use their own equipment on your school network, it is important to make sure that the Acceptable Use Policy is reviewed regularly by all members of the school and adapted as necessary. It must be discussed with pupils at the start of each academic year so that they understand what is in place to protect them and their privacy, and why. Base the policy around behaviour rather than technology. Visitors must also read and sign the Acceptable Use Policy before they use the school's network.
- › It is great that in your school laptops/tablets are easily accessible within a lesson. Using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.

### Data protection

- › It is good that all users are attributed a different password by the system in your school. Remind all school members never to write their given password down anywhere, certainly not on a sticker on a computer! Also, ensure that the Acceptable Use Policy reminds staff and pupils to keep their passwords secure and not share them with others.
- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.
- › It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.

### Software licensing

- › Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.
- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.

## IT Management

- › There is a mechanism set up in your school that allows any staff member to make a request for new hardware/software - a request that leads to an informed decision within a reasonable amount of time. This is great as this way teacher can benefit from new technologies while still staying inline with school policy.
- › In the interests of innovative pedagogical practice, it may seem necessary to allow staff and pupils to upload software to school-owned hardware, however this should only be done by the person in charge of the school ICT network in conformity with the School Policy. Staff and pupils should be aware of this through the Acceptable Use Policy they are required to sign. All new software uploaded to school equipment needs to be in conformity with licensing requirements.

## Policy

### Acceptable Use Policy (AUP)

- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at [www.esafetylabel.eu/group/community/acceptable-use-policy-aup-](http://www.esafetylabel.eu/group/community/acceptable-use-policy-aup-).
- › It is good practise that whenever changes are put into place in your school, the school policies are revised if needed. Note though, that also changes outside the school can affect policies such as new legislations or changing technologies. Therefore please review your policies at least annually.

### Reporting and Incident-Handling

- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.
- › Please share the materials in which you tackle these issues especially with pupils and parents in the of the eSafety Label portal.
- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline ([www.inhope.org](http://www.inhope.org)).

## Staff policy

- › You have guidelines in your Acceptable Use Policy (AUP) on teachers' classroom usage of mobile phones. Upload your AUP to your school profile as it is a model of good practice that can help other eSafety Label schools.

## Pupil practice/behaviour

- › You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your [My school area](#) so that other schools can benefit from your experience.
- › It is good that pupils have the possibility to shape school activities when discussing eSafety, be it extra-curricular and curricular ones, based on what is going on in their daily lives. This way they will be more engaged and it also allows the teacher to recognise real life issues.

## School presence online

- › It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.
- › Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks ([www.esafetymlabel.eu/group/community/schools-on-social-networks](http://www.esafetymlabel.eu/group/community/schools-on-social-networks)) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.

# Practice

## Management of eSafety

- › Technology develops rapidly. It is good practice that the member of staff responsible for ICT is regularly sent to trainings and/or conferences to be aware of new features and risks. Check out the [Better Internet for Kids portal](#) to stay up to date with the latest trends in the online world.

## eSafety in the curriculum

- › It is good that you are making a specific reference to sexting within your child protection policy as this is a growing issue that many young people are having to deal with. It is also important to ensure that you are providing appropriate education for pupils about this issue.
- › It is good that eSafety is taught as part of the curriculum in your school. Ensure that all staff are delivering eSafety education where appropriate throughout the curriculum and not just through ICT or Personal Social and Health lessons. You/your staff may find some useful ideas and resources in the fact sheet Embedding eSafety in the curriculum at [www.esafetymlabel.eu/group/community/embedding-online-safety-in-curriculum](http://www.esafetymlabel.eu/group/community/embedding-online-safety-in-curriculum).

- › It is commendable that you are able to provide an eSafety curriculum that keeps up with emerging issues. Continue to make use of new resources as they are made available. Can you upload to your school profile an outline of how you design the curriculum and links to some of the resources you use – this would be most helpful for other schools.
- › It is good practice that all pupils in all year groups in your school are taught about eSafety. It continues to be important to review regularly the curriculum provision to ensure it meets ever-changing needs. If you have a curriculum review process of this kind, it would be helpful to other schools if you could publish this on your school profile. To upload go to your [My school area](#).

## Extra curricular activities

- › Consider sharing the information you have about your pupils' online habits with other schools through the eSafety Label community. You could, for example, upload your latest survey findings on pupils' online habits to your school profile via your [My school area](#).
- › Gather feedback from pupils to see what sort of additional eSafety support they would benefit from outside curriculum time. Could they be involved in delivering some of this to their peers? Check the resource section on the eSafety Label portal to find resources that will help them do this; check out the fact sheet on Pupils' use of online technology outside school at [www.esafetymlabel.eu/group/community/pupils-use-of-online-technology-outside-school](http://www.esafetymlabel.eu/group/community/pupils-use-of-online-technology-outside-school).
- › How do you organise peer mentoring among pupils on eSafety? Check out the resources of the [ENABLE project](#) and share your ideas in the [forum](#) of the eSafety Label community so that other schools can benefit from your experience to establish a similar approach.

## Sources of support

- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at [www.esafetymlabel.eu/group/community/information-for-parents](http://www.esafetymlabel.eu/group/community/information-for-parents) to find resources that could be circulated to parents and ideas for parent evenings.

## Staff training

- › Your school makes sure that every teacher is trained on cyberbullying. Please share resources that are used in these trainings via uploading them to your [My school area](#). Are you also monitoring the effect that this training had on the number of incidents?

**The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.**
